

Glossary

Computer
(For Class 1)

My Book of Computer 1

Lesson 1:

excited: strong feelings of happiness

computer: a machine that takes input, process it and gives output very quickly. It can store data or information also

machine: anything which makes our work easy

electronic machine: a machine which works through electricity

calculations: getting results after following some mathematical steps

E-mail: electronic mail, it is a message that is exchanged between computers joined together

telephone: a machine that sends our voice over a distance through electric wires

typing: entering text(numbers, letters) into the computer using keyboard

Lesson 2:

knowledge: information about anything

monitor: an output device which display all the workings of the computer

CPU: Central processing unit, it takes in data, processes it and gives the output

commands: instructions to do any work

keyboard: an input device used for entering data or instructions into the computer

mouse: an input device through which we control the cursor on the screen

hardware: all those devices which we can touch with our hands

testing: to check anything

Lesson 3:

bank: a place where we deposit or save our money

supermarket: a place for selling foods and households

construction: to built or create something

hospital: a place where sick and ill people are treated with medicine

withdrew: to come back or leave something

laptop: a small computer which can be used while traveling

engineers: a person who may design, build or maintain machines

pilots: a person who controls an airplane

airline: a public service for air transport

iPad tablet: a small touch screen computer without keyboard

flight: a process of flying

patient: a person who is sick or ill and is treated by some medicines

amazement: to be surprised

forget: fail to remember

record: a collection of past information

Lesson 4:

tasks: work to be done

machine: anything which makes our work more easier

quantity: amount or number of anything

cost: amount to be paid

speed: the time taken in doing some work

manually: any work done without using machines

difference: not same

perfect: absolute or complete and free from mistakes

possible: work that can be done

reasons: cause of something

Lesson 5:

mouse: a part of computer is use to move the cursor on the computer screen: an area on television or computer which shows images

afraid: frightened or worried for something

arrow: a mark or sign like an arrow to point something

monitor: a part of computer having a screen that shows all the work done on the computer

cursor: a moveable indicator or pointer on computer screen

sound: anything which we hear with the help of our ears

wheel : an object which is fixed below a vehicle to move

movement: to change place from one point to another

Lesson 6:

Keyboard: a part of a computer having keys and use for typing and entering the data into the computer

alphabetical order: alphabets starting from A and ending on Z

action: doing any work

quickly: very fast

bottom: downwards or below

space: distance or gap

Lesson 7

disk: it is present inside the computer to store large amount of data

storage device: a part in computer on data is stored

removable: that may be cleaned or removed

flash D Hard drive: small electronic device that contains flash memory which is used for storing data

CD: compact disc

USB: Universal Serial Bus is used to connect computers and electronic devices. Also used for transferring the data

information: knowledge or to learn about something

carry: to lift or transport something from one place to another

Lesson 8

hardware: tools, machinery or parts which can be touched and used in our hands

touch: to feel something with our hands or fingers

software: the programs used by computers

instructions: to give order

particular task: any especial work to do

operating System: an important program which helps the computer for doing especial tasks

applications: it is a program designed to perform specific functions like; drawing, painting, image editing etc

programs: especial instructions given to computer to perform important tasks

versions: same thing but in different way

Lesson 9

damage: a loss or an injury or destruction of anything

careful: to be aware of any danger

grownup: an adult

magnetic: very attractive or pulling force

cables or wires: they supply electricity

insert: to fit something in a particular place

eraser: an object usually rubber use to rub or remove something written

gently: very softly

switch: a device which helps for making and breaking the connections in an electric circuit

Lesson 10

fun: happiness or joy

follow: come after or move behind

steps: doing any work in sequence or one by one

panel: a small group of people sitting for discussion

work: mental or physical activity done to get the result

closely: very near

contains: to carry

need: requirement

drag: to pull horizontally

favorite: something especial

enlarges: become more bigger

pick: to choose or hold something

lesson: to teach

repeat: anything which is done again

process: steps taken for doing something

redraw : to draw anything in a new way

previously: earlier time or the time before today

Lesson 11

save: not in danger

options: choices or more than one

previous: before

file: folder for keeping important records

think: idea about something

descriptive: explanatory or to explain something

finding: to search for

folder: a place to keep the important work save

appears: becomes visible

list: anything written in a pattern one below the other

Lesson 12

great: excellent or very well

fun: enjoyment or happiness

shapes: external appearance

change: something different

blinking: to open and close the eye

leave: go away from

again: to repeat

completed: finish

error: mistake

remove: go away or to eliminate

wrong: not correct

action: any work done

earlier: before

learned: to get knowledge

Lesson 13

excited: very happy or in higher energy state

birthday: that day on which a person is born

greeting: sign of welcome

decided: conformed or resolved

design: a plan to show the look and functioning of any working

few: a small number or minority

borders: boundary of something

member: an individual of a group or an organization

amazed: surprised

skills: talent or qualities

delighted: feeling great pleasure

hug: an act of holding someone tightly in one's arm

artist: a person who makes paintings, sculptures or drawing as a profession or **hobby:** an activity or interest done regularly

roof: upper covering of any building or house

sure: conformed

gap: distance

bright: dark

trunk: stem of a tree
